Technical Skills

Key skills: Flutter, Dart

Languages & Tech: Dart, Flutter, Firebase, OOPs, Git, GitHub

Professional Experience

Frontend Intern (Flutter) | Ventura

May '23 - Sep '23

- Developed and implemented a module and conducted bug fixing and troubleshooting tasks on a mobile and web application.

Software Engineer | GoBall

Dec '21 – Aug '22

Experience working with a startup helped me to improve my planning, management, and decision-making skills.

- Developed an application for sportspersons where users can build their community and live stream their games.
- Led a team** of 4 developers. Managed, supervised, educated, trained them, and improved their skills.
- Provide assistance & **review the code** of all team members on a regular basis.
- Achieved targets to build MVP **1 month** earlier than expected.
- Write golden tests for UI components.

Flutter Developer | Twinnr

July '21 – Dec '21

- Developed a web application [\[Link\]](#) using **Flutter web** from scratch where users can configure the mobile applications by entering details.
- Created independently versioned **packages** for Firebase services, styles, and fonts.
- Developed a package for **converting web applications into apps** from JSON configurations.

Flutter Developer | IBL Infotech

Feb '20 – Aug '21

Developed mobile applications for Android and IOS using Flutter and Dart.

- Implemented best practices for state management and wrote clean and readable code using **BLoC**, **Provider** state management libraries.
- Worked collaboratively in an **agile** environment, using **CI/CD with GitHub actions** and writing **unit tests**.
- Built social media application with security features(**RSA and AES encryption**), custom widgets, and pixel-perfect UI having functionalities of chat, create todos, reminders, events, and albums.
- Fix bugs and refactor existing code to improve app performance and user experience.
- Refactor UI and Integrated **REST API** for an E-Commerce application.

Flutter Developer | Android Developer | Freelance

Feb '19 – Feb '20

- Developed a native Android app for a restaurant that manages orders. Improved client satisfaction by **migrating to Flutter** resulted in improved UI and performance by **30%**.
- Built an expense tracker application using Flutter with category and date filtering.

Project

Project Management Application [\[Frontend\]](#) [\[Backend\]](#)

- Independently developed a Project Management application using **Flutter, Python, FastAPI**, and **PostgreSQL** gaining valuable hands-on experience in UI design, API development, and database integration.
- Implemented features for creating project roadmaps, task creation and assignment, notes and documents management, developing skills in software development, data modeling, and user interface design.

Education

Bachelor of Computer Applications (**BCA**)
Indira Gandhi National Open University (**IGNOU**)

Jul '20 - Jun '23
Surat, India
